As a result-driven **Full Stack Developer**, I specialize in **Next.js** and **MERN** stack, encompassing a deep appreciation for **Linux** and terminal/**CLI**.

## WORK EXPERIENCE

### Front-End Web Developer

Free Lance

#### Achievements/Tasks

- Accumulated **3 years** of hands-on experience in crafting responsive and visually appealing web applications using **HTML**, **CSS**, and **JavaScript**.
- Utilized **React** for **2 years** to build robust and scalable single-page applications (SPAs), demonstrating expertise in component-based architecture and state management.
- Developed **Next.js** applications for 1 year, leveraging server-side rendering (**SSR**) and **routing** capabilities to optimize performance and **SEO**.

### Back-End Developer

Personal

#### Achievements/Tasks

- Gained 1 year of valuable experience in building back-end systems with **Node.js** and **Express.js**.
- Developed **RESTful** APIs to facilitate communication between front-end and back-end components, ensuring data retrieval and manipulation.
- Proficient in **MongoDB**, managing data storage and retrieval efficiently, and implementing data models for applications.
- Collaborated with cross-functional teams to design and implement end-to-end solutions for various web projects.

## EDUCATION

### BSc.Physics

VINAYAKA MISSION UNIVERSITY

03/2014 - 07/2016

TAMILNADU,INDIA

#### Courses

- PHYSICS

## SKILLS

Nextjs

Nodejs

Mongodb

Reactjs

Express.js

RESTApi

javascript

redux/rtk

HTML

CSS

jsx

## PERSONAL PROJECTS

### Blogs (Next.js)

- full featured blogs website using **Next.js Page Routing**, **API routes** and **mongodb** as backend.Has featured post page all posts pages and contact form page .
- form data will be picked by Api routes and be stored in mongodb database. posts are written in **markdown** then rendered in html for simplicity.
- App uses nextjs page router for client-side routing, api routing for **RESTApi**, **Mongodb Atlas** for data storage, next.js **SSR**, gray-matter ,react-markdown remark images to convert mark-down files into React components.

### Events (Next.js)

- Events app displays events ,All events featured events or individual events page , one can filter event by date or by featured .
- App uses **Next.JS** page router for **Client-side Routing**, api routing for **RESTApi**, mongodb atlas for data storage, next.js **SSR**,

### House Market Place (React.js)

- House selling and renting app written in **React** ,where anyone can explore listed hose or login with email or google **Oauth** to list his house for rent/sale.
- User can login to manage his house listing ,upload images edit or delete listing.
- App uses **React-Router-Dom** for client side routing, **leaflet** for street map ,swiper for image sliding and **react-toastify** for toast notification.

## ACHIEVEMENTS

### LEETCODE RATING(MAX 2140)

Managed to get maximum rating of 2140 in leetcode
